Anton Do

Frontend Developer

Experience

Cognitive Talent Solutions | Frontend Developer | Oct 2024 - Present

- Thrived in a dynamic startup environment, wearing multiple hats as a developer and UI designer to drive product development and enhance user experience.

- Designed and iterated UI mockups for a subscription page using **Material UI** and **Tailwind CSS**, gathering and implementing feedback to improve user experience.

- Developed and integrated a **responsive** checkout page with PayPal REST APIs, streamlining the payment process and enhancing user flow.

- Collaborated with **cross-functional teams**, working directly with the CEO, CTO, and Product Manager to align on project goals and deliver high-impact features.

- Ensured mobile responsiveness for a **React.js** application, optimizing the website for seamless user experience across devices.

Projects

Petsy | Frontend Developer | Feb 2023

- Designed intuitive wireframes in **Figma**, translating them into fully functional UI components in **React.js**.

- Iterated on design components in **Figma**, refining visuals and usability before final development.

- Collaborated with **cross-functional teams** to align on design solutions and implement cohesive, user-friendly interfaces.

Lets Hang | Fullstack Developer | Mar 2023

- Developed a responsive full-stack web application with a Python Flask backend and a React frontend, ensuring seamless functionality and user experience.

- Designed and refined multiple UI components, iterating extensively to enhance usability and visual appeal.
